

General Profile

Live export generated on behalf of Giuseppe Baldassarre · Source: FAO Careers Section (Taleo) · Generated 09/Aug/2026 via "Print/Email → General Profile" · jobs.fao.org

Personal Information

Full Name	GIUSEPPE BALDASSARRE
FAO Index Number	3101741
Corporate Roster	Yes
Title	Dr
Date of Birth	17/Jan/1983
Country of birth	Italy
City of birth	Potenza
Gender	Male
Marital status	Single
1st Nationality	Italy
Permanent Residence Country	Italy
Permanent Residence City	Potenza
Current Country	Portugal
Current City	Lisboa
Zip/Postal Code	1100-523
Street Address (line 1)	Tv. de São João da Praça 36 - Casa 1
Skype Address	gbal17
Mobile Phone Number	+393713619920
Home Phone Number	+390971411690
Private Email Address	gi.baldassarre@gmail.com
Highest Academic Qualification	5 Doctorate (Ph.D. or equivalent)
Highest Academic Program	Environmental Engineering
English Self-Assessed level	C - Excellent/Working knowledge
Spanish Self-Assessed level	C - Excellent/Working knowledge
Language 1	Italian - MT - Mother Tongue
Language 2	Portuguese - B - Intermediate/limited
Language 3	Turkish - B - Intermediate/limited
FAO Nationality	Italy
Name of Supervisor	PEISER, MS LIVIA
FAO email address	Giuseppe.Baldassarre@fao.org
Job Title	Geospatial Analyst
Grade	B
Organization	NSLDD
Contract Type	COF.REG
Appointment EOD Date	30/Apr/2026
Appointment NTE Date	18/Dec/2026
BSAFE Issue Date	17/Jul/2023
Source	FAO website

Education

FAO Institution	Università degli studi della Basilicata
Academic Qualification	5 Doctorate (Ph.D. or equivalent)

Institution Location	Potenza
Qualification obtained	PhD in Environmental Engineering
Main Subject	Remote sensing
Status	Completed
Start / Graduation	Nov/2007 – Feb/2011
Thesis / info	My investigation during the Ph.D., carried out between the University of Wisconsin-Madison (2 years) in the USA and the University of Basilicata (1 year) in Italy, focused on the several applications of remote sensing for environmental monitoring. The final dissertation discussed the “Performance of the most advanced satellite techniques for real-time monitoring of forest fires over Italy”. The research activity has been focused on the development and assessment of advanced satellite fire detection products using statistical tools and GIS.

FAO Institution	University of Lisbon – Universidade de Lisboa (UL)
Academic Qualification	4 Master's Degree (or equivalent)
Institution Location	Lisbon
Qualification obtained	Mediterranean Forestry and Natural Resource Management
Main Subject	Forestry and Natural Resource Management
Status	Completed
Start / Graduation	Sep/2018 – Dec/2020
Thesis / info	1st year: University of Lisbon (Portugal), Valladolid (Spain) & Padova (Italy) – natural resource management, decision support systems, forest governance, agroforestry, fire ecology & management, GIS. 2nd year: University of Porto (Portugal) & Lleida (Spain) – governance of Mediterranean forests, economics, research methods. Thesis: “Characterization of fire regimes in Turkey using MODIS active fire and burned area data”.

Graduated with Excellent standing; overall average 8.91/10 (University of Lleida transcript).

FAO Institution	Università degli studi della Basilicata
Academic Qualification	4 Master's Degree (or equivalent)
Institution Location	Potenza
Qualification obtained	M.S., Environmental Engineering
Main Subject	Environmental Engineering
Status	Completed
Start / Graduation	Sep/2004 – Jul/2007
Thesis / info	Thesis: "Robust satellite techniques for fire monitoring: analysis of expected performances using geostationary satellites (MSG-SEVIRI)". Main subjects: water treatment and waste management, atmospheric physics, water/air/soil pollution dynamics.

Graduated with honours, final score 110/110.

FAO Institution	Università degli studi della Basilicata
Academic Qualification	2 Bachelor's Degree (or equivalent)
Institution Location	Potenza
Qualification obtained	B.S., Environmental Engineering
Main Subject	Environmental Engineering
Status	Completed
Start / Graduation	Sep/2001 – Dec/2004
Thesis / info	Thesis: "Soil magnetic susceptibility measurements in industrial areas for the study of metal contamination levels" – analysis of heavy metal contamination of air in the industrial area of Potenza. Main subjects: algebra and geometry, mathematics, chemistry, statistics, environmental engineering, economics, environmental physics, applied geology.

Graduated with honours, final score 110/110.

FAO Institution	N/A
Academic Qualification	1 Secondary School Diploma
Institution Location	Potenza
Qualification obtained	High school of Scientific Studies Diploma
Main Subject	Mathematics
Status	Completed
Start / Graduation	Sep/1996 – Jul/2001
Thesis / info	Main subjects: Italian literature, mathematics, physics, natural science and biology, English language, Latin language.

Employment History

Current Job	Yes
Employer	Food and Agriculture Organization of the United Nations (FAO)
Job Title	Geospatial Analyst
Professional Area	Environment, Natural Resources and Climate Change
Dates	Apr/2026 – present
Country / City	Portugal / Lisbon
Description	Serving as Geospatial Analyst under FAO NSLD (GCP/GLO/11848/GFF), supporting 21 UNCCD country Parties in SDG Indicator 15.3.1 / Land Degradation Neutrality reporting for the 2026 PRAIS4 cycle (COP17 deadline). Designed and implemented a modular GEE-to-PRAIS4 Python pipeline covering all four SO1 sub-indicators (Land Cover, Land Productivity Dynamics, Soil Organic Carbon, SDG 15.3.1 composite), generating PRAIS4-ready tabular and raster outputs directly from Google Earth Engine exports — replacing a manual, non-standardized process with a repeatable one applicable across all 21 country contexts. Piloted the full workflow for Mongolia, integrating national land cover data, transition matrices, and spatial layers compliant with PRAIS4 upload requirements — validating the pipeline's transferability ahead of rollout to the remaining countries in the 2026 reporting cycle. Led migration of GEE scripts and assets from third-party vendor infrastructure into FAO-controlled infrastructure (corporate GEE project, GitHub repository), removing external dependency and giving FAO direct ownership of the toolchain. Provided hands-on country-level support for PRAIS4 data upload, technical documentation, and knowledge transfer.
Supervisor	Livia Peiser – Senior Land and Water Officer – Livia.Peiser@fao.org (may be contacted: Yes)

Current Job	No
Employer	Food and Agriculture Organization of the United Nations (FAO)
Job Title	Geospatial Analyst
Professional Area	Environment, Natural Resources and Climate Change
Dates	Feb/2026 – Apr/2026
Country / City	Portugal / Lisbon
Description	Served as Geospatial Analyst under FAO Afghanistan, in collaboration with UNOSAT/UNITAR, supporting the AWARE platform (Afghanistan Watch for Agriculture, Resilience and Risk Exposure; https://data.apps.fao.org/aware) — a geospatial decision-support system covering ~401 sub-national districts with 60+ indicators across six thematic pillars. Supervised design and computation of the district-level INFORM Risk Index, structured across three pillars (Hazard & Exposure, Vulnerability, Lack of Coping Capacity) in a Pillar → Category → Sub-component → Indicator

	hierarchy. Led systematic QA of the underlying calculation workbook against the AFG Final Narrative Report 2026 (UNOSAT/UNITAR v1.0), producing a traceability document that established a verifiable audit trail for the index's methodology. Prepared and published 35 composite INFORM layers to the CKAN catalogue in compliance with FAO interoperability standards. Developed stakeholder presentations and capacity-development materials supporting platform dissemination among FAO Afghanistan colleagues and national partners.
Supervisor	Matieu Henry – Technical Officer, NSL (Land and Water Division) – Matieu.Henry@fao.org (may be contacted: Yes)
Current Job	No
Employer	Food and Agriculture Organization of the United Nations (FAO)
Job Title	Geospatial Analyst
Professional Area	Environment, Natural Resources and Climate Change
Dates	Nov/2025 – Dec/2025
Country / City	Portugal / Lisbon
Description	Designed and implemented an automated national land cover production workflow in Google Earth Engine and Python, integrating AlphaEarth Foundations Satellite Embeddings V1, Sentinel-2 imagery, and Random Forest classification to produce a 10m-resolution national land cover map for drought impact assessment (https://openknowledge.fao.org/handle/20.500.14283/ce0956en). Built and harmonized training/validation datasets using Collect Earth Online, applying FAO geospatial standards (LCML/ISO 19144-2) throughout classification and accuracy assessment. Delivered national land cover, cropland (irrigated/rainfed), and grazing-land datasets that directly support Syria's agricultural monitoring and drought decision-making. Produced full technical documentation and metadata ensuring the product's interoperability and reuse.
Supervisor	Matieu Henry – Technical Officer, NSL (Land and Water Division) – Matieu.Henry@fao.org (may be contacted: Yes)
Current Job	No
Employer	Food and Agriculture Organization of the United Nations (FAO)
Job Title	Remote Sensing and GIS Specialist
Professional Area	Environment, Natural Resources and Climate Change
Dates	Oct/2025 – Nov/2025
Country / City	Portugal / Lisbon
Description	Provided technical assistance to FAO Pakistan for geospatial impact assessment of floods on cropland using GIS/RS tools (https://www.fao.org/geospatial/news/news-detail/fao-releases-geospatial-flood-impact-assessment-for-pakistan--2025/en). Processed Sentinel-1/2, Landsat, and VIIRS imagery for land and water monitoring, classification, and accuracy assessment in line with FAO LCML/ISO standards. Updated 2023–2024 cropland and crop-type layers, generated flood extent and duration maps (KP, Punjab, Sindh – data.apps.fao.org catalog), and assessed impacts by irrigation system and crop type (crop-type maps for KP, Punjab, Sindh). Developed automated workflows in Google Earth Engine, harmonized spatial datasets, and uploaded the newly developed layers to the FAO Agro-Informatics Platform — directly informing FAO's national flood response. Supported capacity development materials, technical documentation, and presentations for FAO and national partners, including province-level one-pagers (KP, Punjab, Sindh – openknowledge.fao.org) and the full published report (https://openknowledge.fao.org/items/a3d91bad-bbcb-42a1-85f1-0b9f6457d858).
Supervisor	Matieu Henry – Technical Officer, NSL (Land and Water Division) – Matieu.Henry@fao.org (may be contacted: Yes)
Current Job	No

Employer	Food and Agriculture Organization of the United Nations (FAO)
Job Title	International GIS/RS land and water monitoring expert
Professional Area	Environment, Natural Resources and Climate Change
Dates	Aug/2025 – Sep/2025
Country / City	Portugal / Lisbon
Description	Served as Remote Sensing Specialist under NSL HQ supporting the ROOTS project (GF.NSLSD.RY1020000CT69), finalizing the project's geospatial results-visualization platform in full compliance with FAO's LCML/ISO 19144-2 standards. Integrated zonal statistics and quality-controlled spatial datasets through automated GEE workflows for spatial data harmonization and validation, and supported classification of geospatial layers for ROOTS indicators. Presented the Gambia GeoLab platform (http://34.78.39.234:8082/) at the Geo for Good Summit in Singapore, featured in the official FAO NSL publication "FAO presents the Gambia GeoLab at Geo for Good Summit in Singapore" — extending the platform's visibility beyond the project's national scope. Delivered training materials and capacity-development sessions aligned with the Hand-in-Hand Geospatial Platform's dissemination standards. Produced technical reports, datasets, and concept notes ensuring alignment with FAO's data dissemination standards.
Supervisor	Matieu Henry – Technical Officer, Acting Head of Geospatial Unit (NSL) – Matieu.Henry@fao.org (may be contacted: Yes)

Current Job	No
Employer	Food and Agriculture Organization of the United Nations (FAO)
Job Title	International GIS/RS land and water monitoring expert
Professional Area	Environment, Natural Resources and Climate Change
Dates	Jul/2025
Country / City	Gambia / Banjul
Description	Served as GIS & Remote Sensing Specialist for the PROREFISH climate-resilient fisheries initiative (GCP/GAM/044/GCF), leading mangrove restoration and coastal ecosystem monitoring. Conducted institutional capacity assessments and developed a geospatial methodology for coastal/land-water monitoring aligned with FAO standards. Designed and delivered technical trainings and materials (https://drive.google.com/file/d/1bKH9oAmR6DfebORUtqPH44YM-akl8gxG/view) on satellite data processing, NDVI-based vegetation monitoring, and cloud-computing tools (Google Earth Engine, SEPAL). Developed and published a dedicated GEE application for mangrove monitoring (https://ee-gibaldassarre.projects.earthengine.app/view/pf1), and led classification, validation, and accuracy assessment of mangrove extent. Produced technical reports, metadata, and baseline spatial datasets to guide sustainable mangrove management and national capacity development.
Supervisor	Moshibudi Rampedi – FAO Representative in The Gambia – Moshibudi.Rampedi@fao.org (may be contacted: Yes)

Current Job	No
Employer	Food and Agriculture Organization of the United Nations (FAO)
Job Title	International GIS/RS land and water monitoring expert
Professional Area	Environment, Natural Resources and Climate Change
Dates	Apr/2025
Country / City	Gambia / Banjul
Description	Supported the design of the National Forest Inventory (NFI) by preparing and harmonizing spatial datasets (accessibility, tree cover, forest mask, density, land cover) and integrating field and national data sources. Developed a dedicated GEE application for forest inventory design and visualization (https://ee-gibaldassarre.projects.earthengine.app/view/gfidesignexplorer20101), and contributed directly to sampling design optimization for the National Forest Assessment and Inventory (NFAI), balancing cost, accuracy, and statistical robustness.

Supervisor	Developed and delivered training materials and sessions for government staff on GIS/RS monitoring techniques, spatial data management, and use of cloud-computing platforms (Google Earth Engine, SEPAL) and Python for geospatial processing and automation, building durable in-country technical capacity. Matieu Henry – Technical Officer, Acting Head of Geospatial Unit (NSL) – Matieu.Henry@fao.org (may be contacted: No)
Current Job	No
Employer	Food and Agriculture Organization of the United Nations (FAO)
Job Title	International GIS/RS land and water monitoring expert
Professional Area	Environment, Natural Resources and Climate Change
Dates	Nov/2024
Country / City	Portugal / Lisbon
Description	Provided Geospatial Technical Assistance (GTA) to the IFAD-funded ROOTS project in The Gambia (UTF/GAM/047/GAM). Finalized and operationalized the ROOTS geospatial platform (http://34.78.39.234:8082/), integrating datasets, zonal statistics, and Google Earth Engine applications into a single production system. Developed Python and GEE scripts for automated analysis and reporting, and processed spatial data and metadata for FAO's Agro-Informatics Platform. Prepared technical reports, one-pagers (2023 land cover map of the Gambia), and training materials, and delivered capacity-development sessions for national staff on monitoring techniques, spatial data management, and quality assurance.
Supervisor	Matieu Henry – Technical Officer, Acting Head of Geospatial Unit (NSL) – Matieu.Henry@fao.org (may be contacted: Yes)
Current Job	No
Employer	Food and Agriculture Organization of the United Nations (FAO)
Job Title	International GIS/RS land and water monitoring expert
Professional Area	Environment, Natural Resources and Climate Change
Dates	Feb/2024 – Jun/2024
Country / City	Portugal / Lisbon
Description	Led the finalization of Yemen's national land cover map, land representation system, legend, and atlas — designing and implementing the full GIS/RS production chain from data collection through classification, QA/QC, validation, and publication using Python, SEPAL, and Google Earth Engine. Built and managed a field data collection system with optimized sampling design and quality-controlled databases. Delivered capacity development on legend development, LCML/LCCS standards, and accuracy assessment, and use of FAO tools (Collect Earth Online, SEPAL, GEE). Ensured full compliance with FAO geospatial standards (metadata, interoperability, LCML/ISO 19144-2) and supported publication of the Yemen Land Cover Atlas on the Hand-in-Hand Geospatial Platform (https://openknowledge.fao.org/items/3ca05f72-f0b0-4ccb-9567-531fa8d84619).
Supervisor	Matieu Henry – Technical Officer, Acting Head of Geospatial Unit (NSL) – Matieu.Henry@fao.org (may be contacted: Yes)
Current Job	No
Employer	Food and Agriculture Organization of the United Nations (FAO)
Job Title	International GIS/RS land and water monitoring expert
Professional Area	Environment, Natural Resources and Climate Change
Dates	Jul/2023 – Jan/2024
Country / City	Gambia / Banjul
Description	Served as International GIS/RS Land and Water Monitoring Expert for the Resilience of Organizations for Transformative Smallholder Agriculture (ROOTS) project, providing technical assistance in GIS/RS for agricultural land and water monitoring, including delineation of project areas, indicator selection, and geospatial characterization. Led field data collection design, harmonization, and validation (Python, SEPAL, GEE) and collaborated with

	national partners on thematic maps and spatial indicators under FAO LCML/LCCS standards. Contributed to capacity development through training sessions, technical documentation, and design of the national geospatial monitoring platform for ROOTS. Published the 2023 Land Cover Map of The Gambia — the first developed under the new LCML/ISO 19144-2 reference system — through the FAO video "Land Cover as a fundamental spatial information for sustainable resilient agriculture in The Gambia" (https://www.youtube.com/watch?v=5cydX2MixNs) and the FAO booklet "A framework for monitoring geospatial indicators of the Resilience of Organizations for Transformative Smallholder Agriculture project" (https://openknowledge.fao.org/items/f3175f42-56ff-4b85-892b-528dd124b73a), ensuring metadata integrity and full compliance with FAO interoperability standards.
Supervisor	Matieu Henry – Technical Officer, Acting Head of Geospatial Unit (NSL) – Matieu.Henry@fao.org (may be contacted: Yes)
Current Job	No
Employer	School of Agriculture, University of Lisbon
Job Title	Post-doctoral researcher
Professional Area	Environment, Natural Resources and Climate Change
Dates	Mar/2020 – Jul/2023
Country / City	Portugal / Lisbon
Description	Estimated shrub live fuel moisture content across mainland Portugal using GIS/RS techniques and satellite-derived indicators, contributing to a near-real-time operational LFMC product supporting national decision-making. Mapped national fire regimes using Landsat imagery and time-series analysis, and analyzed traditional extensive pastoralism and its dependence on fire through spatial and temporal GIS/RS assessments. Developed and automated monitoring of the national fuel break network using Sentinel-2, Google Earth Engine (GEE), and Python, validated against GEDI data. Applied image classification, validation, and accuracy assessment following international and FAO geospatial standards throughout. Extended this fire-regime methodology to Turkey using MODIS fire observations. Note: undertaken concurrently with EU Aid Volunteers deployment to SRD Vietnam (Jan/2021–Nov/2022, see below).
Supervisor	José M.C. Pereira – Full Professor – jmcpereira@gmail.com (may be contacted: Yes)
Current Job	No
Employer	The Centre for Sustainable Rural Development (SRD)
Job Title	GIS and Remote Sensing expert
Professional Area	Environment, Natural Resources and Climate Change
Dates	Jan/2021 – Nov/2022
Country / City	Viet Nam / Hanói
Description	Used open-source, moderate-resolution satellite imagery for mapping smallholder coffee production systems driving land use change in Thuan Chau district, NW Vietnam, and analyzed trends in tree canopy cover over 2000–2021. Developed a public GEE application to visualize tree canopy cover change across Vietnam (https://baldassarre.users.earthengine.app/view/euaidsrcd). Estimated aboveground biomass and carbon stock using SAR data for the "Mangrove and Climate Protection Combined with Income Generation for Vulnerable Communities" program (VM069), and developed a companion GEE app to monitor mangrove extent in Southern Vietnam (https://baldassarre.users.earthengine.app/view/srd) — delivered as part of an EU Aid Volunteers deployment, undertaken concurrently with a post-doctoral position at the University of Lisbon.
Supervisor	Vu Thi Bich Hop – Executive Director of SRD – hop@srd.org.vn (may be contacted: Yes)
Current Job	No

Employer	Istanbul Technical University
Job Title	Post-doctoral researcher
Professional Area	Environment, Natural Resources and Climate Change
Dates	Oct/2012 – May/2018
Country / City	Turkey / Istanbul
Description	Worked as a post-doctoral researcher at the Eurasia Institute of Earth Science, Istanbul Technical University, on the KAMAG-TÜBİTAK project to develop an integrated emission inventory over Turkey. Conducted GIS/RS-based atmospheric and land monitoring analyses using Python and satellite data from geostationary and polar-orbiting sensors. Demonstrated that geostationary observations improve the prediction of atmospheric chemical composition during large fire events, with results published in "Using SEVIRI fire observations to drive smoke plumes in the CMAQ air quality model: a case study over Antalya in 2008". Produced a multi-temporal satellite analysis of biomass burning over Turkey and contributed to the design and implementation of the national Fire Information System of Turkey (UYANBIL) and the Biomass Burning Eurasia platform, ensuring data standardization, validation, and alignment with international geospatial best practices.
Supervisor	Luca Pozzoli – Senior Scientist at the Climate and Environmental Research Institute NILU – pozzoliist@gmail.com (may be contacted: Yes)

Current Job	No
Employer	Aprode Peru
Job Title	Environmental consultant
Professional Area	Environmental and Social
Dates	Jun/2011 – Oct/2011
Country / City	Peru / Chulucanas
Description	Volunteered in a project on environmental management and rural waste systems in northern Peru. Conducted field observations and data collection to assess solid waste management practices in remote communities. Prepared reports proposing measures to support local recicladores (informal waste collectors), including safety training, protective equipment, and workplace health measures.
Supervisor	Marieke Van der Zon – Environmental Program Manager at Aprode Peru – mariekevanderzon@gmail.com (may be contacted: Yes)

Certifications

Certification	Issuing Organization	Location	Issue Date
Proof of work accomplished	Aprode Peru	Huacho	Oct/2011
Young Researchers Meeting on Conservation and Sustainable Use of Forest Systems	University of Valladolid (Palencia)	Segovia	Jan/2019
Applications with Newest Multi-Spectral Environmental Satellites	Eumetsat	Potenza	Jul/2009
EU Aid Volunteers Initiative (Lunteren)	MDF training & consultancy	Arnhem	May/2018
Geo for Good Summit Singapore — Invited Speaker, Gambia GeoLab Platform	Google (Google Earth Outreach)	Tanjong Pagar	Sep/2025
Italian Professional Engineer License (Ingegnere, Sez. A – Civil/Environmental)	Ordine degli Ingegneri / Università degli Studi della Basilicata (State Exam)	Potenza	Feb/2008
EU Aid Volunteers Deployment – Senior Volunteer, Community-Based Forest Monitoring	EU Aid Volunteers / Centre for Sustainable Rural Development (SRD)	Ha Noi	Nov/2022
TUBITAK Research Fellowship for Foreign Citizens	Scientific and Technological Research Council of Turkey (TUBITAK)	Çankaya	May/2012

Additional Information

Job Field Preferences	Information Systems and Technology; Environment, Natural Resources and Climate Change; Forestry; Information and Knowledge Management; Land and Water Management; Statistics; Technical Cooperation
Location Preferences	Guyana; Various Locations; Hungary; Italy; Gambia; Ghana; Senegal; Saudi Arabia; Nepal; Thailand; Home-Based
Currently working for another UN common system org?	N/A
